

IN THE CLAIMS:

Please amend the claims as follows:

1. (Currently Amended) A method of providing an additional service to a user ~~[[of]]~~ that subscribes to a communication company's communication service, the method ~~comprising~~ comprising:

accumulating a communication time of each call from a calling party the user receives through the communication service of the communication company; and

providing an additional service to the user ~~who receives a call through the communication service of the communication company;~~ in accordance with ~~[[a]]~~ the accumulated communication time ~~of the call~~, wherein ~~[[a]]~~ the calling party of ~~[[the]]~~ each call, not the user who receives the call, is charged for the call.

2. (Previously Presented) The method according to claim 1, wherein the additional service is a discount of a communication charge to be paid by the user who is not charged for the call, the discount calculated in accordance with the communication time.

3. (Original) The method according to claim 1, wherein the communication company provides the additional service in accordance with the communication time and the amount of communication.

4. (Previously Presented) The method according to claim 1, wherein the communication company provides the additional service in accordance with the length of time the calling party uses the communication services of the communication company.

5. (Previously Presented) The method according to claim 1, wherein the communication company provides the additional service in accordance with (i) a communication time for which the calling party uses the communication services of the communication company and (ii) a communication time for which the calling party does not use the communication services of the communication company.

6. (Previously Presented) The method according to claim 1, wherein the communication company provides the additional service in accordance with (i) a communication time for which the calling party uses the communication services of the communication company and (ii) a communication time not related to the communication services of the communication company used by the calling party.

7. (Currently Amended) A method of providing an additional service to a user [[of]] that subscribes to a communication company's communication service, the method ~~comprising~~ comprising:

accumulating a communication amount of each call from a calling party the user receives through the communication service of the communication company; and

providing the additional service to the user ~~who receives a call through the communication service of the communication company~~; in accordance with the accumulated amount of communication ~~of the call~~, wherein ~~[[a]] the~~ calling party of ~~[[the]]~~ each call, not the user who receives the call, is charged for the call.

8. (Previously Presented) The method according to claim 7, wherein the additional service is a discount of a communication charge to be paid by the user who is not charged for the call, the discount calculated in accordance with amount of communication.

9. (Currently Amended) An additional-service providing apparatus used by a communication company that provides communication services, comprising:  
informing means for informing a user, who ~~uses~~ subscribes to the communication services of the communication company, of a call sent to the user; ~~and~~  
an accumulation means for accumulating a time of communication of each call from a calling party the user receives through the communication services of the communication company; and

providing means for providing at least one additional service to the user in accordance with the accumulated time of communication ~~of the call~~, wherein ~~[[a]] the~~ calling party of ~~[[the]]~~ each call, not the user ~~[[who]]~~ informed of the call, is charged for the call.

10. (Currently Amended) An additional-service providing apparatus used by a communication company that provides communication services, comprising:

sending means for sending a call to a user who ~~uses~~ subscribes to the communication services of the communication company; ~~and~~

an accumulation means for accumulating an amount of communication of each call from a calling party sent to the user through the communication services of the communication company; and

providing means for providing at least one additional service to the user in accordance with the accumulated amount of communication ~~of the call~~, wherein ~~[[a]]~~ the calling party of ~~[[the]]~~ each call, not the user the call is sent to, is charged for the call.

11. (Currently Amended) ~~A computer program product~~ Computer-executable program instructions loadable into the internal memory of a digital computer, comprising program code portions for performing the steps of:

measuring a communication time of a call from a calling party to a user through a communication service of a communication company to which the user subscribes; and

accumulating the measured communication time of each call from a calling party to the user; and

providing an additional service to the user according to the accumulated measured communication time ~~of the call measured by said program code for measuring a~~

~~communication time~~, wherein ~~[[a]] the~~ calling party of ~~[[the]]~~ each call, not the user who receives the call, is charged for the call.

12. (Currently Amended) ~~A computer program product~~ Computer-executable program instructions loadable into the internal memory of a digital computer, comprising program code portions for performing the steps of:

measuring the communication amount of a call from a calling party to a user through a communication service of a communication company to which the user subscribes; and

accumulating the measured communication amount of each call from a calling party to the user; and

providing an additional service to the user according to the accumulated measured communication amount ~~of the call measured by said program code for measuring the communication amount~~, wherein ~~[[a]] the~~ calling party of ~~[[the]]~~ each call, not the user who receives the call, is charged for the call.

13. (Currently Amended) A communication system comprising an accumulator for accumulating at ~~least~~ least one of a communication time and an amount of communication of ~~[[a]] each~~ call from a calling party received by a called party through a communication service of the communication system to which the called party subscribes,

wherein an additional service is provided to ~~[[a]] the~~ called party ~~of the call~~ according to the value of the accumulator, and wherein ~~[[a]] the~~ calling party of ~~[[the]]~~ each call, not the called party, is charged for the call.

14. (Previously Presented) A communication system according to claim 13, further comprising a discount calculator for calculating a discount on a communication charge to be paid by a user to a communication company.

15. (Currently Amended) A communication system in which a called party is connected to a first exchange ~~switching office~~ and a calling party is connected to a second exchange ~~switching office~~, the system comprising:

a third exchange ~~switching office~~ for determining whether ~~a communication service between the called party and the first switching office and a second communication service between the calling party and the second switching office are provided~~ said first exchange and said second exchange are operated by the same communication company to which the called party and the calling party subscribe, and

wherein at least one additional service is provided to the called party according to the determination made by said third exchange ~~switching office~~, and wherein the calling party, not the called party, is charged for a call to the called party, and wherein the additional service is provided according to the communication time or the communication amount of the call provided to the called party through said first exchange.

16. (Currently Amended) A communication system according to Claim 15, further comprising a fourth exchange ~~switching office~~ for selecting one of a plurality of communication companies for connecting the called party according to (i) a system requirement in each of the plurality of communication companies, (ii) a condition required by the calling party, and (iii) a condition required by the called party when the plurality of communication companies provide communication services for the called party.

17. (Currently Amended) A communication system according to Claim 16, wherein the fourth exchange ~~switching office~~ comprises setting means for setting the required conditions,

wherein a subscriber makes a call to a predetermined phone number to access said setting means.

18. (Original) The method according to claim 1, further comprising the step of measuring the communication time.

19. (Original) The method according to claim 7, further comprising the step of measuring the amount of communication.

20. (Original) The additional service providing apparatus of Claim 9, further comprising time measuring means for measuring a communication time of the call.

21. (Original) The additional service providing apparatus of Claim 10, further comprising time measuring means for measuring an amount of communication during the call.

22. (Original) The communication system of Claim 14, further comprising a charge calculator for calculating a communication charge in accordance with a value held by said accumulator.

23. (Previously Presented) The method according to Claim 1, wherein the user receives the call via a radio line of one of a plurality of communication companies.

24. (Currently Amended) The method according to Claim 1, wherein another communication company provides a communication service to the calling party, and the user and the calling party are connected through a first exchange ~~switching office~~ of the communication company and a second exchange ~~switching office~~ of said another communication company.

25. (Previously Presented) The method according to Claim 7, wherein the user receives the call via a radio line of one of a plurality of communication companies.

26. (Currently Amended) The method according to Claim 7, wherein another communication company provides a communication service to the calling party,

and the user and the calling party are connected through a first exchange ~~switching office~~ of the communication company and a second exchange ~~switching office~~ of said another communication company.

27. (Previously Presented) The apparatus according to Claim 9, wherein said informing means informs the user of the call via a radio line of one of a plurality of communication companies.

28. (Currently Amended) The apparatus according to Claim 9, wherein another communication company provides a communication service to the calling party, and the user and the calling party are connected through a first exchange ~~switching office~~ of the communication company and a second exchange ~~switching office~~ of said another communication company.

29. (Previously Presented) The apparatus according to Claim 10, wherein said informing means informs the user of the call via a radio line of one of a plurality of communication companies.

30. (Currently Amended) The apparatus according to Claim 10, wherein another communication company provides a communication service to the calling party, and the user and the calling party are connected through a first exchange ~~switching~~

~~office~~ of the communication company and a second exchange ~~switching office~~ of said another communication company.

31. (Previously Presented) The system according to Claim 13, wherein the called party receives the call via a radio line of one of a plurality of communication companies.

32. (Currently Amended) The system according to Claim 13, wherein a first communication company provides a communication service to the calling party, a second communication company provides a communication service to the called party, and the called party user and the calling party are connected through a first exchange ~~switching office~~ of the first communication company and a second exchange ~~switching office~~ of the second communication company.

33. (Previously Presented) The system according to Claim 15, wherein the called party receives the call via a radio line of one of a plurality of communication companies.
